Industrial Crisis Quarterly 2 (1988) 339–340
Elsevier Science Publishers B.V., Amsterdam — Printed in The Netherlands

Author index

Barad, A.J., *see* Cummings-Saxton, J.
Black, M. and Worthington, R.
Democracy and disaster: the crisis of (meta)planning in America 33
Browning, L.D.
Interpreting the Challenger disaster: communication under conditions of risk and liability 211
Cannell, W., *see* Otway, H.
Crook, A.E., *see* Cummings-Saxton, J.
Cummings-Saxton, J., Ratick, S.J., Talcott, F.W., Dougherty, C.P., Vander Vliet, A., Barad, A.J. and Crook, A.E.
Accidental chemical releases and local emergency response: analysis using the Acute Hazardous Events Data Base 139
Dougherty, C.P., *see* Cummings-Saxton, J.
Gephart, R., Jr.
Managing the meaning of a sour gas well blowout: the public culture of organizational disasters 17
Gianitsopoulos, G., *see* Otway, H.
Greenberg, M.R., *see* Sachsman, D.B.
Haastrup, P., *see* Otway, H.
Harrald, J.R. and Wallace, W.A.
An analytic approach to planning the response to technological disasters 257
Kasperson, J.X., *see* Kasperson, R.E.
Kasperson, R.E. and Kasperson, J.X.
Emergency planning for industrial crises: an overview 81
Kunreuther, H. and Yaksick, R.
Risk management tools for bridging the expert/layperson gap 271
Lukaszewski, J.E.
Tactical ingenuity: new techniques for surviving corporate crises 309
Mileti, D.S., *see* Sorensen, J.H.
Miller, D.
Organizational pathology and industrial crisis 65
Mitroff, I.I., *see* Pauchant, T.C.
Otway, H., Haastrup, P., Cannell, W., Gianitsopoulos, G. and Paruccini, M.
Risk communication in Europe after Chernobyl: a media analysis of seven countries ... 3
Paruccini, M., *see* Otway, H.
Pauchant, T.C. and Mitroff, I.I.
Crisis prone versus crisis avoiding organizations — is your company's culture its own worst enemy in creating crises? 53
Prabhu, M.
The role of criminal law in preventing and reducing chemical hazards 327
Ratick, S.J., *see* Cummings-Saxton, J.
Rogers, G.O., *see* Sorensen, J.H.
Sachsman, D.B., Sandman, P.M., Greenberg, M.R. and Salomone, K.L.
Improving press coverage of environmental risk 283

Salomone, K.L., *see* Sachsman, D.B.
Sanders, R.M.
Bureaucratic responses to executive orders 297
Sandman, P.M., *see* Sachsman, D.B.
Seley, J.E. and Wolpert, J.
Issues in emergency planning for nuclear accidents: the Three Mile Island context 171
Shrivastava, P.
Editorial 1
Sorensen, J.H. and Mileti, D.S.
Warning and evacuation: answering some basic questions 195
Sorensen, J.H. and Rogers, G.O.
Local preparedness for chemical accidents: a survey of U.S. communities 89
Souder, W.E.
Causes of crises: the behavioral accident 185
Talcott, F.W., *see* Cummings-Saxton, J.
Tuler, S.
Individual, group, and organizational decision making in technological emergencies: a review of research 109
Vander Vliet, A., *see* Cummings-Saxton, J.
Wallace, W.A., *see* Harrald, J.R.
Wolpert, J., *see* Seley, J.E.
Worthington, R., *see* Black, M.
Yaksick, R., *see* Kunreuther, H.
Zimmerman, R.
Understanding industrial accidents associated with new technologies: a human resources management approach 229

Industrial Crisis Quarterly 2 (1988) 341–343
Elsevier Science Publishers B.V., Amsterdam — Printed in The Netherlands

Subject index

Behavioral accidents
Causes of crises: the behavioral accident 185
Bureaucratic crises
Bureaucratic responses to executive orders 297
Catastrophe theory
Causes of crises: the behavioral accident 185
Challenger space shuttle accident
Interpreting the Challenger disaster 211
Chemical accidents
Local preparedness for chemical accidents 89
Accidental chemical releases and local emergency response 139
The role of criminal law in preventing and reducing chemical hazards 327
Chernobyl nuclear plant accident
Risk communication in Europe after Chernobyl 3
Coal mine accidents
Causes of crises: the behavioral accident 185
Communication
Risk communication in Europe after Chernobyl 3
Emergency planning for industrial crises 81
Interpreting the Challenger disaster 211
Risk management tools for bridging the expert/layperson gap 271
Tactical ingenuity: new techniques for surviving corporate crises 309
Community preparedness
Local preparedness for chemical accidents 89
Emergency planning for nuclear accidents: the Three Mile Island context 171
Warning and evacuation: answering some basic questions 195
Community responses
Local preparedness for chemical accidents 89
Corporate crisis
Crisis prone versus crisis avoiding organizations 53
Tactical ingenuity: new techniques for surviving corporate crises 309
Corporate culture
Crisis prone versus crisis avoiding organizations 53
Organizational pathology and industrial crisis 65
Understanding industrial accidents associated with new technologies 229
Tactical ingenuity: new techniques for surviving corporate crises 309
Criminal liability
The role of criminal law in preventing and reducing chemical hazards 327
Crisis management
Managing the meaning of a sour gas well blowout 17
Crisis prone versus crisis avoiding organizations 53
Organizational pathology and industrial crisis 65
Emergency planning for industrial crises 81
Decision making in technological emergencies 109

Understanding industrial accidents associated with new technologies 229
Tactical ingenuity: new techniques for surviving corporate crises 309
Data base of hazardous events
Accidental chemical releases and local emergency response 139
Decision making systems
Decision making in technological emergencies 109
See also: Governmental decision making
Disaster behavior
Warning and evacuation: answering some basic questions 195
Emergency planning
Emergency planning for industrial crises 81
Emergency planning for nuclear accidents: the Three Mile Island context 171
Planning the response to technological disasters 257
Emergency response
Local preparedness for chemical accidents 89
Decision making in technological emergencies 109
Accidental chemical releases and local emergency response 139
Environmental risk
Improving press coverage of environmental risk 283
Evacuation
Warning and evacuation: answering some basic questions 195
Gas well blowout
Managing the meaning of a sour gas well blowout 17
Governmental decision making
Bureaucratic responses to executive orders 297
Government policy in crisis situations
Risk communication in Europe after Chernobyl 3
Human resource management
Understanding industrial accidents associated with new technologies 229
Incentives to reduce risks
Risk management tools for bridging the expert/layperson gap 271
Industrial policy
Democracy and disaster: the crisis of (meta)planning in America 33
Marine chemical spills
Planning the response to technological disasters 257
Media analysis
Risk communication in Europe after Chernobyl 3
Media reporting of crises
Managing the meaning of a sour gas well blowout 17
Improving press coverage of environmental risk 283
Media training
Improving press coverage of environmental risk 283
Metaplanning
Democracy and disaster: the crisis of (meta)planning in America 33
Modelling
Causes of crises: the behavioral accident 185
Planning the response to technological disasters 257
New technologies
Understanding industrial accidents associated with new technologies 229
Nuclear technology
Risk communication in Europe after Chernobyl 3
Decision making in technological emergencies 109

Emergency planning for nuclear accidents: the Three Mile Island context 171
Organizational disasters
Managing the meaning of a sour gas well blowout 17
Organizational pathology
Organizational pathology and industrial crisis 65
Policy implementation
Bureaucratic responses to executive orders 297
Preparedness
Emergency planning for industrial crises 81
Local preparedness for chemical accidents 89
Planning the response to technological disasters 257
See also: Community preparedness
Press coverage
Improving press coverage of environmental risk 283
Public relations
Improving press coverage of environmental risk 283
Regulatory control
The role of criminal law in preventing and reducing chemical hazards 327
Risk management
Emergency planning for industrial crises 81
Emergency planning for nuclear accidents: the Three Mile Island context 171
Risk management tools for bridging the expert/layperson gap 271
Safety incentives
Risk management tools for bridging the expert/layperson gap 271
Sanctions to reduce hazards
The role of criminal law in preventing and reducing chemical hazards 327
Sick organizations
Organizational pathology and industrial crisis 65
Socio-political crisis
Democracy and disaster: the crisis of (meta)planning in America 33
Space technology
Interpreting the Challenger disaster 211
Three Mile Island nuclear plant accident
Emergency planning for nuclear accidents: the Three Mile Island context 171
Types of crisis
Organizational pathology and industrial crisis 65
Warning systems
Local preparedness for chemical accidents 89
Warning and evacuation: answering some basic questions 195
